arena is committed to being fully transparent about our suppliers so that you know where our products come from and you can be confident that our partners share our values, rigorous best practices and a desire for continuous improvement.

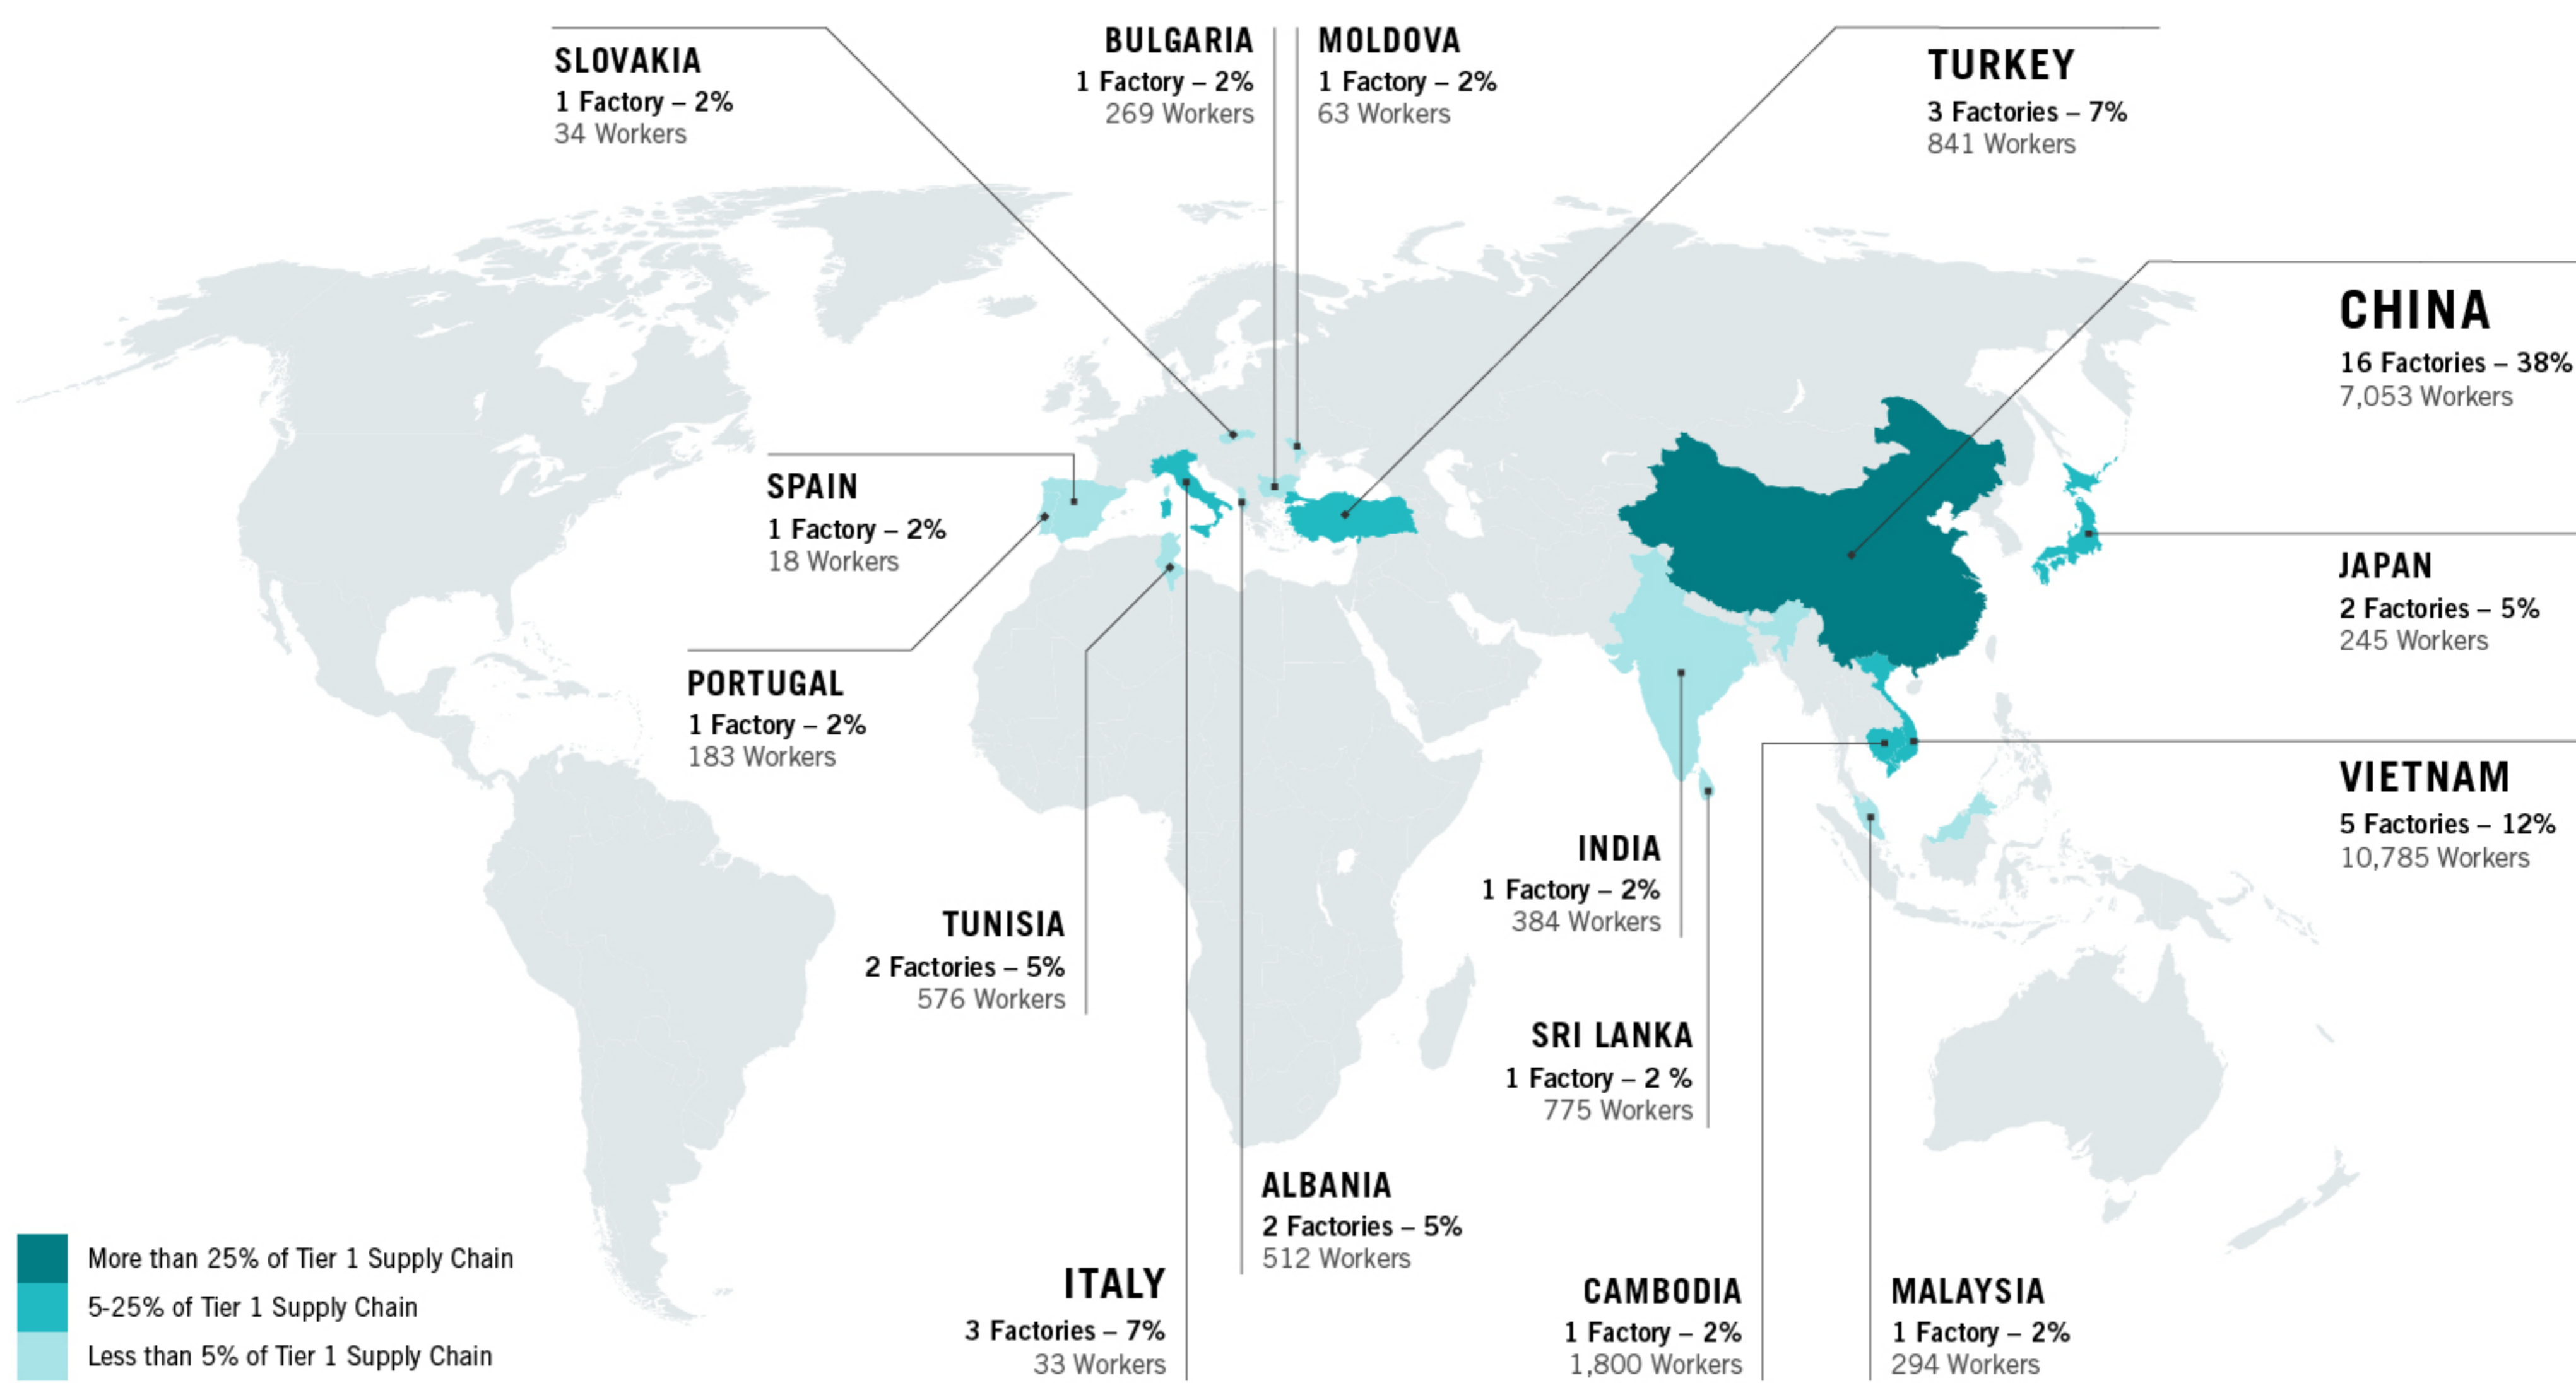

We, at arena, build our business with all our partners on a basis of trust, teamwork, honesty and mutual respect. We are also committed to being transparent by publishing up-to-date information on all our Tier 1 supply chain relationships.

The CSR (Corporate Social Responsibility) team at arena is dedicated to ensuring that our global network of finished goods suppliers are always meeting, and exceeding, our rigorous standards and best practices. The arena family, from our staff to world-wide consumers using our products, are all bound together by a desire for continuous improvement, and we challenge and celebrate our suppliers to strive for the same. arena is proud that more than 80% of our top tier suppliers have been part of our community for more than three years as we build positive long term relationships.

Since inception, arena has based its success on long-lasting strategic partnerships with a selected pool of suppliers, some of whom we have collaborated with for over twenty years. We consider our suppliers more than simply manufacturers of our products: we involve them from the beginning of the development process, we share with them our ideas and we craft the products throughout the production cycle until they finally reach our consumers.

WHERE OUR PRODUCTS ARE MADE

arena's Worldwide Tier 1 Supply Chain Network

OUR SHARED VALUES AND BEST PRACTICES

arena starts partnerships with suppliers who respect the rights of all employees, who illustrate efforts to eliminate or minimize impact on the environment, who provide a safe and healthy workplace and who promote the health and well-being of all employees.

Wherever arena operates around the globe, we are guided by our Code of Conduct and we bind our suppliers to these principles. As an essential requisite for running business relations, suppliers are required to implement and integrate our Code of Conduct within their own employment principles, visibly affixing the Code of Conduct in local languages into areas devoted to arena production. Suppliers must also agree to our monitoring activities and guarantee compliance by each and every sub-contractor involved in manufacturing arena products.

Although arena reserves the right to terminate a relationship at any time for failing to meet our standards of conduct, in most cases termination will occur when a supplier refuses to cooperate with an assessment, refuses to change behaviour or does not make meaningful progress on remediation.

arena is proud to be affiliated with the **Fair Labor Association (FLA)** as a Participating Company.

HOW WE SELECT NEW SUPPLIERS

arena evaluates and determines every new potential supplier in our network to ensure they meet the standards required to start a business relationship.

THE KEY AREAS OF EVALUATION ARE:

THE SUPPLIER QUALIFICATION PROCESS IS COMPOSED OF 3 MAIN PHASES:

PHASE 1: SELF ASSESSMENT (SAT)

Completed by the supplier to identify areas for improvement before phase 2.

PHASE 2: FACTORY ASSESSMENT

Performed by the arena Global Sourcing team (or by designated external provider). On-site evaluation to confirm status and improvements from phase 1. Assessment determines if potential supplier can commence production for arena or not.

PHASE 3: FOLLOW-UP AUDIT

Supplier commits to implement CAP (Corrective Action Plan) within 3 months.

Once the qualification process has been successfully completed and the business relationship has started, the supplier is automatically included in arena's ongoing CSR Monitoring Process.

HOW WE MONITOR AND ASSESS OUR SUPPLY NETWORK

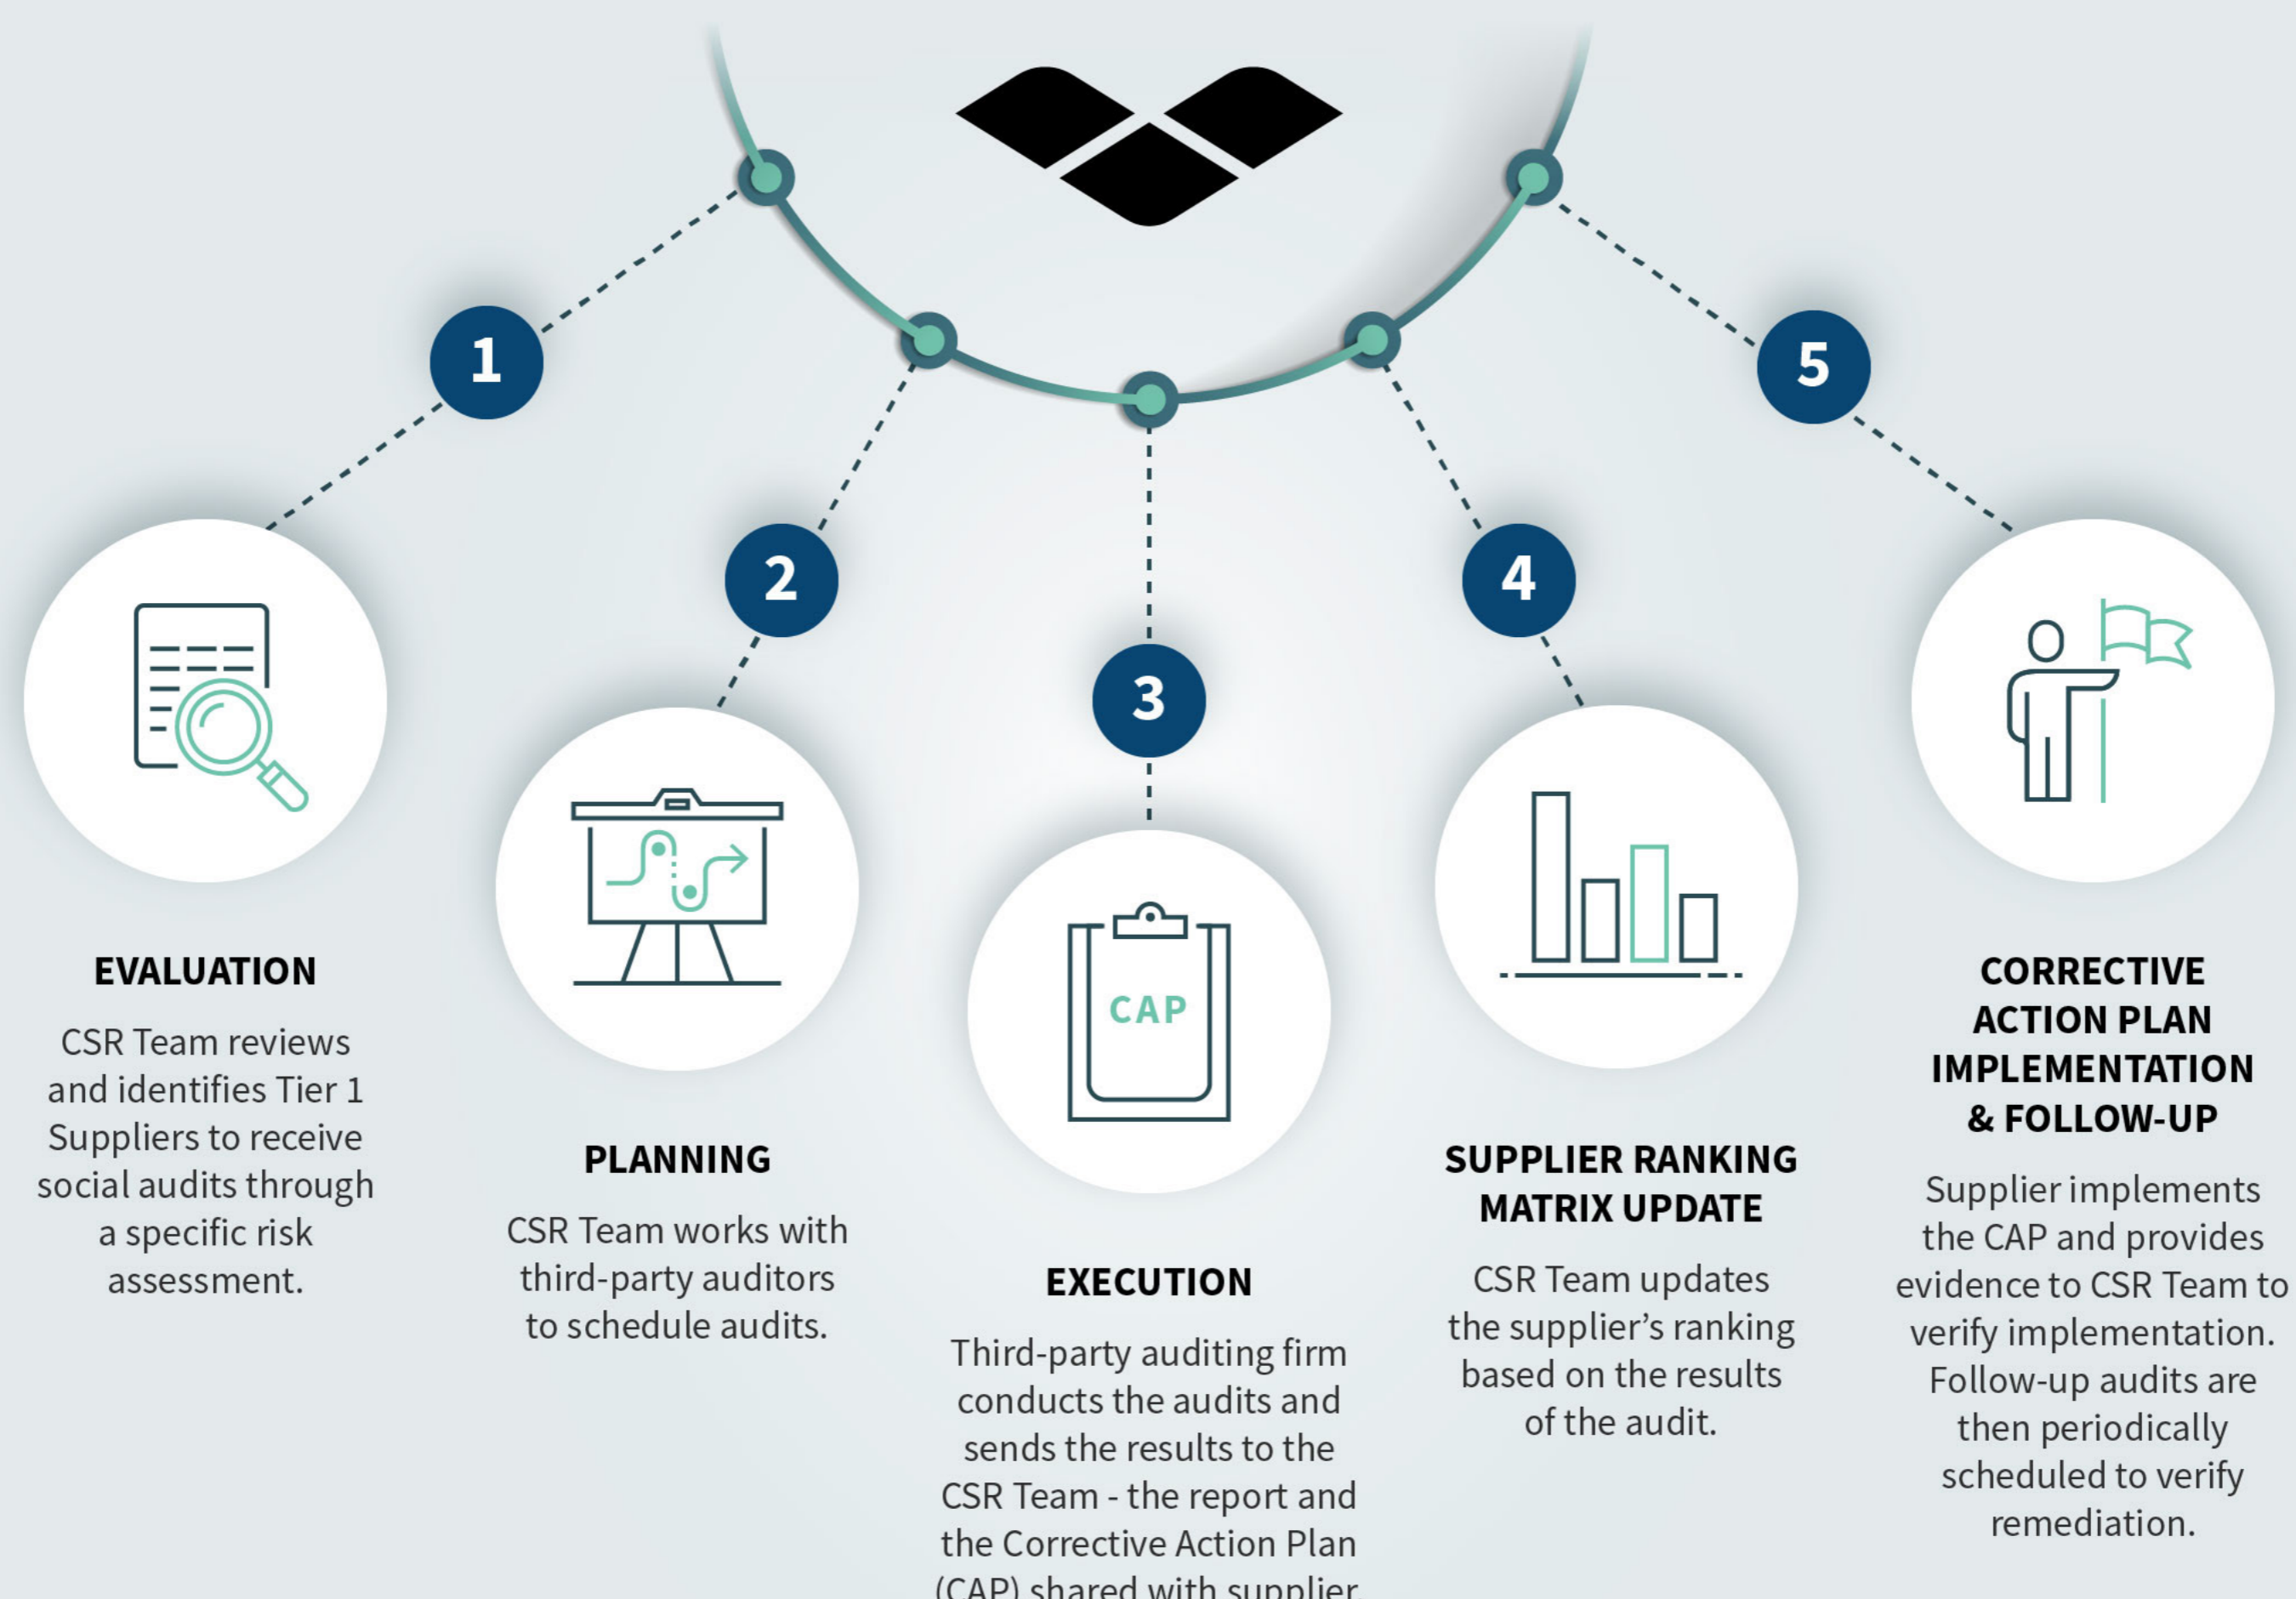

arena continuously monitor every suppliers' compliance with the provisions of the Code of Conduct and track the implementation of each supplier's tailored CAP (Corrective Action Plan) to assess progress and improvements. Suppliers are required to be transparent and provide auditors with prompt access to facilities, records, and workers, including temporary and contingent workers.

Two types of social audits may be carried out at a supplier factory in the arena network:

- FLA Sustainable Compliance (SCI) Assessment:** random assessments by FLA staff
- arena CSR Audit:** an audit directly managed by arena or a designated agency (with methodology validated by the FLA)

85% of arena Tier 1 manufacturing facilities around the world have been audited directly by arena or by an officially designated agency.

Each year, we draw up and implement a plan for our own CSR audits of suppliers based around the following steps:

arena's suppliers are subject to the FLA (Fair Labor Association) Monitoring Program, which annually, randomly selects at least one of them for an additional third-party audit.

Findings from audits are considered as a critical tool to establish an improvement plan to be fulfilled for the sake of both the workers and a successful business partnership. We insist that the CAP for each supplier is drawn up with factory management within 30 days of receiving the assessment report and that improvements are implemented within 6 months. Violations of the Code of Conduct must be immediately addressed as a condition of continued production with arena.

As a leading brand in our industry, we feel the responsibility of driving change throughout the entire value chain. Through our affiliation to the Fair Labour Association, we want to make sure that all our suppliers, across all plants and factories, share and consistently apply a minimum set of rules and fair conditions for the workforce.
